THE PROCESSES:

Pewter Art's exquisite pewterware are diligently crafted through a series of processes to meet the exclusive tastes of pewter lovers.

1. Casting

First, molten pewter is skilfully poured into a pre-heated mould to ensure the smooth flow of metal for a perfect cast. It is then cooled and dismantled so that the mould can be carefully removed to reveal an ideal cast.

3. Soldering

Next, various parts of the item are soldered together. Timing and temperature control are critical factors in this process to create a perfect joint for the item. At *Pewter Art*, skilfully made joints by experienced craftsmen are remarkably strong and virtually invisible.

2. Polishing

The partly-completed pewter is now accordingly polished with several polishing techniques to achieve the desired brilliant finishing. High-speed precision buffing is thus essential to attain the best results.

4. Quality Control

No completed pewter leaves *Pewter Art*'s factory without having been inspected for any possible quality defects. As craftsmen of the ideal pewter, we place utmost importance that every item is checked for precision in weight, quality of finish and consistency in specifications.
